

By investing in our Wedding Photography services, you are not just investing in beautiful images, you are investing in memories that will last a lifetime. You will be able to look back on your wedding day and live again the emotions, the smile, and the joy that you felt on your special day.

**Our approach:**

Our approach is very relaxed, straight forward and based on the acknowledgement that your wedding day is unique to you. We respect that each one deserves to be captured in a natural and honest way that reflects you and your personality.

You get the best of both worlds; we shoot both in documentary and formal style. We strive to capture the story of your wedding day as it unfolds, so there will be no interference, no scripting and repetition of the same set list of pictures. We believe that this is the key to letting your personality shine through! Along the day of course, when needed, we take formal group pictures and posed portraits.

When looking for your wedding photographer, it is important to choose one that you feel works in a style that fits with what you would like. We catch real memories and raw emotions. We shoot creative compositions at many angles. Part of our approach involves shooting up close portraits to immerse the viewer into the scene and create an intimate feeling.

We try to use natural light as much as possible and use flash only when necessary. We love our colours to be Warm, Vibrant and Saturated.

We always encourage pre-wedding consultations to discuss and plan your day.

Our approach places a strong focus on photographing your family, guests, friends, and everything that is going on around you – including all those moments and interactions that you don't get to see on your wedding day.

Our approach and guidance will help you and your guests to get the best possible results, even if you are camera shy or do not know how to pose.

We pride ourselves on being friendly, professional, honest, and trustworthy in everything we do.
